SURFACES & FINISHES POWDER COATED ALUMINIUM

Powder-coated aluminium is a highly durable and aesthetically appealing material widely used in various industries, including construction, automotive, and furniture manufacturing. This coating process involves applying an electrostatically charged powder paint to the aluminium surface, which is then cured under high temperatures to form a uniform, protective layer. The result is a finish that enhances resistance to corrosion, UV exposure, scratches, and general wear, making it ideal for both indoor and outdoor applications.

In addition to its durability, powder-coated aluminium offers significant environmental benefits. Unlike traditional liquid paints, powder coating contains no harmful solvents or volatile organic compounds, reducing its impact on air quality. Furthermore, the process produces minimal waste, as excess powder can be collected and reused. With a wide range of color and texture options, powder-coated aluminium provides a long-lasting, low-maintenance solution that meets both functional and aesthetic requirements in modern design and manufacturing.

SURFACES & FINISHES CERAMIC

The simplicity of a processed stone, like a rock which is honed by the water in a river, the Natural surface provides a uniform and natural feel. It is a semi-matt finish which only partially reflects light, creating a diffused and agreeable glow while making spaces harmonious.

The Natural finish has no noticeable unevenness or roughness, providing a smooth tactile experience combined with the solidity of the surface; it has a distinct appearance since it is delightfully uniform.

Laminam surfaces are capable of replicating the authentic aesthetics of stones such as marble or quartz while remaining versatile and durable thanks to its superior technical performance levels and the easy maintenance typical of ceramic.

SURFACES & FINISHES

**SOLID
WOOD**

Teak is one of the most highly prized hardwoods, valued for its exceptional resistance to moisture, insects, and rot. The natural oils within teak wood make it highly durable, which is why it has been used for centuries in outdoor furniture, boat building, and decking. Teak is a symbol of luxury and longevity, offering a timeless, elegant appearance that enhances both indoor and outdoor spaces.

Iroko, often referred to as “African teak,” shares many of the same characteristics as teak but is more affordable, making it a popular alternative. Iroko is strong, durable, and resistant to decay, moisture, and pests, which makes it well-suited for use in outdoor furnitures.

NATURAL
MATERIAL

SUSTAINABLE

RESPONSIBLE
FORESTRY

* Being a natural material, Teak & Iroko may change colour or even crack due to humidity levels and sudden changes in temperature. Left outdoors, undergoes a natural process of oxidation that affects its colour, which turns an attractive silver-grey shade.

Teak & Iroko furniture is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the wood with sealant every three months, more frequently in the case of hotel and catering establishments. To restore the original appearance of Teak & Iroko, sand all over and apply special sealant.

SURFACES & FINISHES HIGH PRESSURE LAMINATE

HPL is a next-generation high-pressure laminate product that offers exceptional durability and advanced surface technology. Featuring a fingerprint-resistant, soft, smooth, and antibacterial surface, it is hygienic and easy to clean.

This innovative material is highly resistant to scratches, chemicals, and UV radiation, ensuring long-lasting performance in both indoor and outdoor environments. Its outdoor durability makes it ideal for exterior applications, withstanding harsh weather conditions. Additionally, HPL meets health and safety standards for food contact. Combining superior resistance, cleanliness, and aesthetic appeal, HPL sets the standard in surface technology for commercial, residential, and industrial uses.

BRAIDS & STRAPS

BRAIDS

Maxxmora offers three types of high-quality braids, each designed to withstand outdoor conditions while providing exceptional durability and color retention.

100% solution-dyed acrylic, which is specifically engineered for outdoor use. This braid offers excellent resistance to fading, ensuring the vibrant colors stay intact even when exposed to harsh sunlight and weather. The braided acrylic cover over a polyester filament adds tensile strength, enhancing the overall durability of the product.

* Olefin-based braid, offering a blend of strength, fading resistance, and weather performance. It is perfect for both aesthetic appeal and functional use.

** PVC-coated polyester, known for its superior technical properties. The PVC coating provides excellent resistance to UV rays, moisture, and wear, making it ideal for demanding outdoor environments where durability is key.

Maxxmora's braids come in a wide variety of colors, allowing for creative freedom in design and adding a unique touch to any outdoor project.

Colours may vary due to lighting conditions or screen settings.

BRAIDS & STRAPS STRAPS

Maxxmora's 100% olefin strap braids are crafted with a double-sided weave, providing enhanced durability and versatility. These braids are designed for outdoor use, offering exceptional resistance to environmental factors such as UV rays, moisture, and weather. The double-sided design allows for a unique color combination, as the braid features two distinct colors that appear on both sides, adding a layer of creativity and uniqueness to any product.

These braids are not only aesthetically appealing but also highly functional. The high tensile strength ensures resistance to forces and stresses, making them ideal for applications that require both flexibility and strength. Additionally, the olefin material offers outstanding colorfastness, ensuring that the colors remain vibrant and true even after prolonged exposure to sunlight and harsh outdoor conditions.

Maxxmora's olefin strap braids are 100% outdoor-compatible, designed to meet the demands of outdoor environments while providing long-lasting performance and style.

FABRICS FAUX LEATHER

Flame-resistant faux leather is a high-performance material designed to provide enhanced safety without compromising on style and durability. Engineered with fire-retardant properties, this synthetic leather meets stringent flammability standards, making it an ideal choice for industries that prioritize fire safety. Its specially treated surface delays ignition, reduces flame spread, and minimizes smoke production, ensuring compliance with international fire safety regulations.

Faux leathers are also favorably enduring for outdoor conditions and have resistance to stain, dirt, and other remainings. The composition of the artificial leather is 2% vinyl acrylic 76% polyvinyl chloride 22% Polyester and has 100.000 Martindale and fire retardancy properties.

FABRICS PROJECT SOLUTIONS

FABRIC CLASS-1

Project Solutions introduces its 100% PES (Polyester) fabric, designed to meet the highest industry standards for durability, performance and aesthetics.

With its superior resilience against environmental factors, its an ideal choice for outdoor furniture, automotive interiors, marine applications, and architectural shading systems.

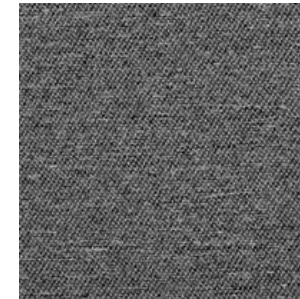

Engineered for both functionality and longevity, PES fabric offers outstanding resistance to moisture, mold, and stains, making it a low-maintenance and cost-effective solution. Its high tensile strength and dimensional stability ensure reliable performance even in the most demanding conditions. Available in a wide range of colors and textures, this fabric exemplifies Project Solutions commitment to innovation, sustainability, and excellence in textile manufacturing.

FABRICS TUYO

FABRIC CLASS-1

The Tuyo series represents one of the most recognized weavings in the acrylic outdoor upholstery group, with one significant difference — a difference that makes all the impact. Traditional awning fabrics are typically stiff to the touch, and products made from them, such as sunbed cushions, outdoor furniture, and chairs, tend to offer an unpleasant tactile experience due to the inherent nature of the fabric. In contrast, the Tuyo series are offering a soft texture while maintaining the classic appearance. The result is a combination of a traditional look and outstanding performance.

The Tuyo series is available in an impressive palette of thirty-two colors, including all essential neutral and earthy tones, as well as the indispensable greens and reds for outdoor settings. This diverse range of colors is beautifully complemented by an irreplaceable softness, making it a perfect choice for refined outdoor environments.

FABRICS TELMA

Designed to bring beauty to every moment, Telma is a fabric that seamlessly blends exceptional durability with an elegant and lightweight composition. Through an intricate weaving process, Telma is crafted using bi-color yarns in reverse and plain weaves, creating a subtle relief effect that enhances its natural charm. This meticulous craftsmanship results in a fabric that is not only visually captivating but also resilient enough to withstand high-traffic outdoor environments.

Produced using an artisanal technique that allows tones to ripple across the fabric's surface, Telma is available in a carefully curated palette of thirteen refined colors, including fresh hues and soft neutrals. Its sophisticated aesthetic, combined with outstanding performance characteristics, makes it the ultimate outdoor fabric solution—perfectly suited to meet the needs of both designers and end users seeking durability, style, and long-lasting quality.

FABRICS LIVIO

FABRIC CLASS-1

Olefin outdoor fabrics have quickly become an essential part of modern outdoor living, thanks to their exceptional performance characteristics. With rapid moisture absorption and quick-drying properties, they offer superior resistance to fading, mildew, and chemicals, ensuring long-lasting durability in various outdoor environments. Additionally, they meet the highest industry standards for lightfastness, wash fastness, seawater resistance, and pool water resistance, making them an ideal choice for outdoor applications. Now available in a carefully curated four color palette, the Livio series has secured its place in our collections, offering both functionality and aesthetic appeal.

Like all our outdoor fabric series, Livio is treated with a high-level water-repellent finish, making it particularly well-suited for poolside and beachside furniture. The collection features a subtle zigzag pattern in bi-color designs, with a striking selection of bold outdoor hues, including vibrant oranges and deep blues, exuding a sense of grandeur. At the same time, earth-toned dual-color options capture an understated elegance, bringing sophistication to any outdoor setting.

FABRICS SEKOYA

The blooming of a flower in nature is a profound reminder of beauty, renewal, and the boundless potential of the natural world. It welcomes us with warmth and serves as a constant, almost miraculous symbol of life's ever-unfolding promise. Where flowers bloom, hope flourishes, spreading joy like the flutter of wings. Inspired by these emotions, the Sekoya series was designed to complement acrylic fabrics with a pattern that embodies this philosophy. Instead of traditional floral motifs, the repetitive patterns and rich colors of Sekoya leaves were chosen to reflect this essence.

This design decision was not only an artistic expression but also a testament to the visual and emotional connection it creates with users. The final aesthetic, shaped by user preferences and application, validates that Sekoya is more than just a fabric—it is a statement of elegance, harmony, and nature's enduring inspiration.

FABRICS UTOPIA & VICKY

FABRIC CLASS-1

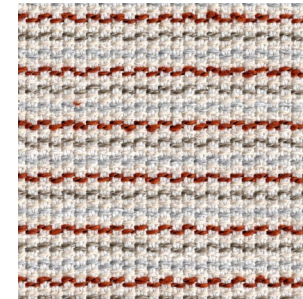

Utopia&Vicky proudly presents its 100% Olefin fabric, expertly crafted to deliver outstanding durability, refined aesthetics, and reliable performance across diverse applications.

Designed with both resilience and style in mind, this innovative fabric offers excellent protection against moisture, mold, and stains, making it a practical and low-maintenance choice. Its high tensile strength and dimensional stability ensure consistent quality in outdoor furniture, marine environments, automotive interiors, and architectural shading systems.

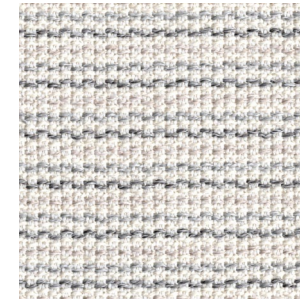

Combining cutting-edge textile engineering with a forward-thinking design approach, Utopia & Vicky's Olefin fabrics reflect a commitment to modernity, sustainability, and aesthetic evolution. Available in an extensive palette of colors and textures, it is the perfect balance of contemporary design and long-lasting performance.

FABRICS VANELLI

FABRIC CLASS-1

Vanelli fabrics feature a composite blend of Acrylic and Polypropylene (PP), designed for superior durability in outdoor conditions. This unique combination offers exceptional resistance to weather elements, UV rays, and wear, ensuring the fabrics maintain their strength and appearance over time. The use of acrylic provides excellent color retention, while polypropylene adds to the fabric's overall resilience and lightness.

Vanelli's collection also offers a wide variety of patterns and colors, allowing for creative freedom in design. Whether used for outdoor furniture, cushions, or upholstery, these fabrics combine style and functionality, making them ideal for both residential and commercial outdoor applications.

FABRICS ODYSSEY

The Sunbrella Odyssey Fabric Collection is designed to elevate outdoor spaces with a perfect blend of durability, performance, and style. Known for its exceptional resistance to fading, stains, and mildew, the Odyssey collection combines innovative technology with luxurious aesthetics, making it ideal for both residential and commercial applications.

Crafted with Sunbrella's renowned solution-dyed acrylic fibers, Odyssey fabrics are not only long-lasting but also soft to the touch, ensuring comfort without compromising on strength. The collection features a variety of colors and patterns, from classic neutrals to vibrant hues, all designed to complement diverse outdoor environments.

FABRICS BATYLINE QUADRO

Developed by Serge Ferrari and Maxxmora, Batyline Quadro is a revolutionary material that combines exceptional durability with a unique color selection. Designed specifically for sunbeds, it offers high sagging resistance, ensuring long-lasting performance even under intense use.

One of its key advantages is its effortless cleaning, making maintenance incredibly easy. Thanks to its high-performance sling properties, Batyline Quadro provides outstanding comfort and resilience.

Additionally, it meets strict environmental and safety standards, holding OEKO-TEX certification and Green Guard Certificate, ensuring very low levels of COV and formaldehyde emissions. With three ready-to-use color options, this material is the perfect choice for premium outdoor furniture, combining aesthetics, comfort, and longevity.

Whether for luxury resorts or private poolsides, Batyline Quadro guarantees an unmatched experience with its superior design and high-performance characteristics.

BATYLINE EDEN & ELIOS

Today's users seek warm and relaxing outdoor experiences, and the Batyline Eden&Elios range meets this demand with exceptional sensorial comfort. Eden and Elios fabrics feature a soft touch, a textile look, and a contemporary design, enhancing any outdoor space with both elegance and functionality.

Thanks to their high-performance characteristics, these fabrics ensure long-lasting durability, making them perfect for outdoor furniture. The textured yarn in the weave provides a unique textile aspect while maintaining strength and flexibility.

For the most demanding outdoor applications, Batyline Eden offers waterproof versions, incorporating a protective film on the back to resist moisture and harsh conditions. Additionally, these fabrics are easy to clean and hold OEKO-TEX certification and Green Guard Certificate, ensuring very low levels of COV and formaldehyde emissions.

With Batyline Eden and Elios, comfort, durability, and environmental responsibility come together in perfect harmony.
